

Idiagbon Saadu Abdulrahman

Full-Stack & Blockchain Developer

[Email](#) · [LinkedIn](#) · [GitHub](#) · [X](#)

PROFESSIONAL SUMMARY

Full-Stack & Blockchain Developer focused on turning product ideas into complete, production-oriented applications. Experienced across frontend and backend development, API design, databases, authentication, real-time systems, media handling, and modern web application architecture. Comfortable working across the full development lifecycle — from understanding a product requirement and designing its architecture to implementing, integrating, testing, and refining the final experience.

Also experienced with blockchain and Web3 technologies, with an interest in applying decentralized systems, wallets, smart contracts, and blockchain infrastructure to useful products.

TECHNICAL SKILLS

Frontend:

Next.js, React, Vite, TypeScript, JavaScript, Tailwind CSS, HTML, CSS

Backend:

Node.js, REST APIs, Express.js, API design, server-side application development

Database and Data:

MongoDB, Prisma, Mongoose, Supabase, PostgreSQL

Real-Time & Integration:

Socket.IO, Pusher.js, third-party API integration, payment integrations

Authentication & Security:

Authentication flows, authorization, role-based access control, secure API design

Blockchain / Web3:

Blockchain application development, wallets, smart-contract integrations, Web3 tooling

Cloud & Infrastructure:

Vercel, Render, Cloudinary, Git, GitHub

Engineering:

Responsive UI development, component architecture, system design, debugging, performance, accessibility

EXPERIENCE

Toshconsult LTD**Full-Stack Developer · 2022**

After completing my developer training, transitioned into a full-stack development role working across frontend and backend applications while also supporting other developers through tutoring and mentorship.

- Built and maintained web applications across both frontend and backend layers.
- Developed responsive user interfaces and backend functionality for web products.
- Worked with APIs, databases, authentication, and application logic across the stack.
- Tutored and mentored other developers, helping them understand development concepts and improve their practical skills.
- Contributed to notable projects including **Alpha Bills** and **Gited Brainz**.

Technologies: React.js, TypeScript, Node.js, Express.js, MongoDB, Mongoose

MSMEs Ecosystem Ltd**Frontend Developer · 2023 till date**

Worked on fintech products within the Tulu ecosystem, contributing to frontend development and user-facing product experiences.

- Developed and refined responsive interfaces for fintech products.

- Translated product requirements and designs into functional frontend experiences.
- Contributed across products within the Tulu ecosystem, including **Voucher Pay, Tulu Borrow, Tulu Asset, Tulu Purse, and Tulu Switch**.
- Collaborated with the development team to improve product functionality and user experience.
- Worked within a product environment spanning payments, exchange, digital assets, wallets, and switching.

Technologies: Next.js, TypeScript

SELECTED PROJECTS

DevCollab

Collaboration Platform · 2026

A collaborative platform for developers to find collaborators, discover projects, organise work, and build together.

- Developed across the frontend, backend, data, authentication, matching, and real-time collaboration layers.
- Built developer profiles and project discovery workflows.
- Implemented a weighted collaborator-matching system based on skill, reputation, recent activity, experience, availability, and context.
- Worked with real-time functionality using Socket.IO.
- Evolved the application architecture toward Next.js while preserving existing product functionality.

Technologies: Next.js, React, TypeScript, Tailwind CSS, Node.js, REST, Socket.IO, MongoDB, Prisma

GitHub: github.com/olayinka06-dev/dev-collab

Atemy

Social & Community Platform · 2024

A full-stack social platform built around communities, profiles, posts, interaction, messaging, and real-time communication.

- Developed across frontend and backend application layers.
- Built community, membership, profile, post, interaction, and messaging functionality.
- Implemented role-based permissions for members, moderators, and administrators.
- Integrated Socket.IO for real-time community, post, and messaging functionality.
- Integrated Cloudinary for user and community media.
- Used optimistic local updates for straightforward interactions to keep the interface responsive.

Technologies: Next js, TypeScript, Tailwind CSS, Express.js, Socket.IO, MongoDB, Prisma, Cloudinary

Live: atemy.vercel.app

Tulu Ecosystem

Fintech Products

Contributed as a frontend developer to a fintech ecosystem spanning multiple products and financial workflows.

Products: Voucher Pay · Tulu Borrow · Tulu Asset · Tulu Purse · Tulu Switch

Technologies: Next.js, TypeScript

ENGINEERING APPROACH

- Start from the problem and user rather than the framework.
- Own the complete path from interface to API, data, authentication, and deployment.
- Break complex requirements into clear, maintainable systems.
- Prefer predictable behaviour, clear architecture, and code that other developers can understand.
- Approach migrations and large changes incrementally through **analyse** → **plan** → **implement** → **verify**.

EDUCATION

University of Ilorin

Bachelor of Medicine, Bachelor of Surgery (MBBS)

Nigeria

ADDITIONAL

Developer Brand: olayinka.dev

Open to: Full-time software engineering roles, freelance projects, and product-focused development opportunities.
